**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 5,944,251 to LaFleur. See Fig. 8.

Regarding claim 2, LaFleur discloses that the excess material outside of seal lines (52, 56, and 60) may be removed. See column 4, lines 23-28. This removal of excess material in LaFleur meets the recitation “wherein each of the first and second sheets is formed with recesses, outside of the projecting portions, widthwise of the sheet.”

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
4. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F.R. 1.111, including: “The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims

"define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 714.02 and MPEP 2163.06. The "disclosure" includes the claims, the specification and the drawings.
